

DIYNEZA.

SEO & Ranking Roadmap

A step-by-step growth plan to rank DIYNEZA across Google, Bing and AI search (ChatGPT, Gemini, Perplexity) — and convert that traffic into restaurant sign-ups.

Goal: Top rankings for restaurant POS & management software

Prepared for: Meghansh Agarwal, Founder & Roop Jaiswal, Co-Founder • diyneza.com

Reality check (important): No one can guarantee “#1 for everything” — Google ranks on **content + backlinks + domain authority + time**. The on-page & technical SEO is already maxed out (done ). This roadmap covers the **off-page & content work** that actually moves rankings. Expect early wins in 4–8 weeks, strong movement in 3–6 months.

What's already done

Foundation shipped — no further work needed here.

- Technical SEO: sitemap, robots.txt (AI crawlers allowed), canonicals, metadata, mobile-first, Core Web Vitals (Desktop 99 / Mobile 81).
- Structured data: Organization, Person (Founders), WebSite+SearchAction, Service, FAQ, BlogPosting, Breadcrumb, Product/Offer.
- Founder entity (Meghansh Agarwal + Roop Jaiswal) linked across schema, About page & Knowledge-Graph signals.
- Analytics stack (GA4 + Meta Pixel + Clarity) — admin-editable IDs; full event tracking.
- Conversion: working Book-a-Demo / 45-day free-trial forms → admin CRM; win-back tab title.

The roadmap (by priority)

WEEK 1 · DO NOW

Get indexed & tracked

- **Google Search Console** — verify *diyneza.com*, submit *sitemap.xml*, request indexing for all key pages.
- **Bing Webmaster Tools** — verify + submit sitemap (also feeds ChatGPT/Copilot).
- **Connect GSC ↔ GA4** for search-query data.
- **Plug in tracking IDs** (Admin → Analytics & Tracking): GA4, Meta Pixel, Clarity. Confirm in GA4 Realtime.
- **Test the lead flow** — submit a demo request, confirm it lands in Admin → Leads.

WEEK 1-2 · DO NOW**Local presence & first backlinks**

- **Google Business Profile** — create & verify (category: Software company). Add logo, photos, link.
- **List on software directories** (each = a backlink + buyer traffic): **Capterra, G2, GetApp, Software Suggest, SaaSworthy, Crunchbase, Product Hunt**.
- **India directories:** Justdial, IndiaMART, Sulekha (if targeting Indian restaurants).
- **Social profiles** — claim & complete LinkedIn (company + both founders), X/Twitter, Instagram, YouTube; link back to site. Keep handles consistent with schema *sameAs*.

MONTH 1 · HIGH**Content engine — start ranking for buyer queries**

- **Publish 1-2 blogs/week** via Admin → Journal CMS. Target high-intent keywords.
- **Comparison / alternative pages** (highest conversion): “Petpooja Alternative”, “Best Restaurant POS in India 2026”, “DIYNEZA vs <competitor>”.
- **Bottom-funnel guides:** “How to choose a restaurant POS”, “Restaurant billing software pricing”, “QR ordering setup”.
- Every article: clear H1/H2, FAQ block, internal links to /products & /pricing, author = a founder.

Why comparison pages? People searching “Petpooja alternative” are ready to buy — these rank faster and convert far better than generic terms.

MONTH 2-3 · MEDIUM**Authority & off-page**

- **Guest posts & PR** on restaurant/F&B and SaaS blogs (do-follow links).
- **Digital PR:** publish a data study (“State of restaurant tech 2026”) → earns natural links.
- **Founder thought leadership:** Meghansh & Roop post weekly on LinkedIn/X → brand + entity signals.
- **Build topic clusters:** pillar page (e.g. “Restaurant Management”) linking to 6-8 supporting articles.
- **Get reviews** on G2/Capterra (★ ratings show in search + power AggregateRating schema).

MONTH 3-6 · GROWTH**Scale & dominate niches**

- **Programmatic/location pages:** “Restaurant POS in <city>” for top cities you serve.
- **Use-case landing pages:** cafe, QSR, cloud kitchen, fine dining, bakery (already in /solutions — expand each to a full page).
- **Video SEO:** product demo on YouTube + embed (add VideoObject schema).
- **Refresh & re-optimize** top pages based on GSC query data quarterly.
- **Backlink outreach** ongoing — aim for steadily growing referring domains.

- Keep **clear, factual, question-based content** (FAQs, definitions, comparisons) — AI engines quote these.
- Strengthen the **entity**: consistent name/founder/social info everywhere (Wikipedia-style facts, Crunchbase, LinkedIn).
- Earn mentions on **high-trust sites** (G2, Capterra, news) — AI models cite trusted sources.
- Keep robots.txt **open to GPTBot, ClaudeBot, PerplexityBot, Google-Extended** (already done .

90-day content calendar (starter)

Week	Article (target keyword)	Type
1	Best Restaurant POS Software in India (2026)	Listicle / buyer
2	Petpooja Alternative: Why Restaurants Switch to DIYNEZA	Comparison
3	How to Reduce Food Wastage in Your Restaurant	Guide
4	Restaurant Billing Software: Complete Buyer's Guide	Pillar
5	QR Code Ordering: Setup & Benefits	How-to
6	Cloud Kitchen Software: What You Actually Need	Use-case
7	KDS vs Paper Tickets: The Real Cost	Comparison
8	How to Manage Multiple Restaurant Outlets	Guide
9–12	City pages + “DIYNEZA vs <competitor>” + recipe-costing guide	Mixed

High-intent target keywords

Buyer / bottom-funnel • restaurant POS software • restaurant billing software (India) • best restaurant management software • Petpooja alternative • cafe billing software • cloud kitchen software	Top / mid-funnel • how to reduce food wastage • QR ordering for restaurants • kitchen display system • recipe costing • multi-outlet restaurant management • restaurant inventory management
--	---

KPIs to track (monthly)

Metric	Where	30-day target	90-day target
Indexed pages	GSC	All pages	30+ (with blogs)
Organic clicks	GSC	First clicks	Steady weekly growth
Ranking keywords	GSC / Ahrefs	10–20	100+
Referring domains	Ahrefs / GSC	10+	30–50+
Demo / trial leads	GA4 + Admin CRM	First leads	Growing pipeline
Reviews (G2/Capterra)	Directories	3–5	15+

Quick-start checklist (this week)

- ☐ Verify Google Search Console + submit sitemap.xml
- ☐ Verify Bing Webmaster Tools + submit sitemap
- ☐ Add GA4 / Meta Pixel / Clarity IDs in Admin → Analytics & Tracking
- ☐ Create & verify Google Business Profile
- ☐ List on Capterra, G2, GetApp, Crunchbase, Product Hunt
- ☐ Complete LinkedIn (company + both founders), X, Instagram
- ☐ Update founders' real photos + social URLs (Admin → Founders)
- ☐ Replace sample stats/ratings with real numbers
- ☐ Publish first 2 blog posts (comparison + listicle)
- ☐ Ask first 5 customers for G2/Capterra reviews
